Active Investigational Protocols:

1. Smoking in pregnancy: analysis of a smoking cessation project in West Virginia. West Virginia University/Charleston Area Medical Center IRB Approved Protocol #07-10-1984.
2. Substance abuse in pregnancy: Role of universal drug screening and integrated addiction therapy in West Virginia. West Virginia University/Charleston Area Medical Center IRB Exempt Protocol #1997097.
3. Perceptions of Appropriate Weight Gain During Pregnancy in Appalachia. West Virginia University/Charleston Area Medical Center IRB Exempt Protocol #1997114 (10/21/2011).
4. Umbilical and Uterine Artery Doppler Studies Predicting Outcome in Pregnancies Affected By Maternal Tobacco Abuse. West Virginia University/Charleston Area Medical Center IRB Exempt Protocol #1997413.

Previous Investigational Protocols:

1. Random urine protein/creatinine ratio for quantification of proteinuria in pregnancy: an outcomes based, cost consequence analysis. Madigan Army Medical Center IRB Approved Protocol #98-060.
2. Delayed maternal expulsive efforts: effects on instrumental delivery. Madigan Army Medical Center IRB Approved Protocol #99-023.
3. Extending the duration of active phase arrest: effects on cesarean delivery. Madigan Army Medical Center IRB Approved Protocol #99-024.
4. Comparison of elective labor induction and spontaneous vaginal delivery: a randomized, controlled clinical trial. Madigan Army Medical Center IRB Approved Protocol #99-035.
5. Use of transvaginal sonography in predicting preterm delivery in patients with preterm contractions. Madigan Army Medical Center IRB Approved Protocol #99-051.
6. Fetal macrosomia: outcomes analysis in military population. Madigan Army Medical Center IRB Approved Protocol #99-075.
7. The effects of shear stress on placental production of placental vascular endothelial growth factor (VEGF), placental growth factor (PLGF), and tumor necrosis factor (TNF-alpha) in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #2000-024.
8. The effects of hypoxia and hypoxia with acidemia on placental production of vascular endothelial growth factor and placenta growth factor in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #2000-029.
9. Immunohistochemical and molecular biotechnologic detection of the human adrenomedullin receptor. Madigan Army Medical Center IRB Approved Protocol #2000-043.

10. Fetal growth curves in a military population. Madigan Army Medical Center IRB Approved Protocol #2000-055.
11. Magnesium in preeclampsia: plasma (maternal-fetal) and placental levels of ionized magnesium (iMg). Madigan Army Medical Center IRB Approved Protocol #2000-091.
12. Hispanic ethnicity and the relationship of ultrasound criteria for attributable risk for aneuploidy. Madigan Army Medical Center IRB Approved Protocol #2000-094.
13. The effects of hypoxia and hypoxia with acidemia on placental production of adrenomedullin in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #2000-096.
14. Maternal lipid metabolism and pregnancy outcome. Madigan Army Medical Center IRB Approved Protocol #2000-108. (co-investigator of \$2 million NIH protocol)
15. Mentoring for the new millennium: enhanced scholarly activity, professional development, and personal satisfaction for future academics through the successful implementation of a mentor system. . Madigan Army Medical Center IRB Approved Protocol #2000-127.
16. US Navy female service member readiness: a leader's guide-implementation phase: utility validation survey. Madigan Army Medical Center IRB Approved Protocol #2000-128.
17. Comparative study of ultrasound detected fetal anomalies and maternal age in two healthcare systems (referral versus routine screening). Madigan Army Medical Center IRB Approved Protocol #2000-131.
18. Differential mRNA expression in the preeclamptic vs normal human placenta. Madigan Army Medical Center IRB Approved Protocol #2001-026.
19. Localization and quantification of apoptosis in human placental tissue. Madigan Army Medical Center IRB Approved Protocol #2001-028.
20. Effect of angiotnesin II on fetal placental perfusion pressures in preeclampsia ex vivo cotyledon. Madigan Army Medical Center IRB Approved Protocol #2001-030
21. Prenatal maternal serum analyte screening within the WRMC of the DoD MHS: microeconomic analysis of various models of screening or the additional burden of unintended cost shifts of a "cheaper" system. Madigan Army Medical Center IRB Approved Protocol #2001-031
22. Birth weight as a function of maternal duty status and participation in mandatory physical training program. Madigan Army Medical Center IRB Approved Protocol # 2001-032.
23. Return to fitness after implementation of formal Pregnant Soldier Wellness Program (PSWP) active duty (AD) obstetrical focus interdisciplinary clinic and discharge education. Madigan Army Medical Center IRB Approved Protocol #2001-034.
24. Effect of low-dose ASA and AT-II on fetal-placental perfusion pressure in the preeclamptic ex vivo cotyledon. Madigan Army Medical Center IRB Approved Protocol #2001-065.

25. The effects of pregnancy and delivery on pelvic organ support in nulliparous pregnant females. Madigan Army Medical Center IRB Approved Protocol #2001-096.
26. Mentoring for the new millennium: enhanced scholarly activity, professional development, and personal satisfaction for future academics through the successful implementation of a mentor system. Madigan Army Medical Center IRB Approved Protocol #2001-127.
27. Production of anti-adrenomedullin receptor monoclonal antibodies in *Mus musculus*. Madigan Army Medical Center IRB Approved Protocol #2001-130.
28. Comparative study of ultrasound detected fetal anomalies and maternal age in two healthcare systems (referral versus routine screening). Madigan Army Medical Center IRB Approved Protocol #2001-131.
29. Natural history of intra-uterine fetal demise (IUFD) in twin gestation. Madigan Army Medical Center IRB Approved Protocol #2002-001.
30. The effects of cyclooxygenase II inhibitor on prostacyclin and thromboxane A2 production by placental arteries from normal and preeclamptic patients. Madigan Army Medical Center IRB Approved Protocol #2002/022.
31. Smoking in pregnancy: analysis of a smoking cessation project in West Virginia. West Virginia University/Charleston Area Medical Center IRB Approved Protocol #07-10-1984.
32. Perceptions of weight gain during pregnancy in Appalachia. West Virginia University/Charleston Area Medical Center IRB Exempt Protocol #1997114.
32. Phospholipase A2 producing bacteria, age at gestation, cervical length measurement and the incidence of preterm birth. (prospective pilot study). West Virginia University/Charleston Area Medical Center IRB Approved Protocol #08-11-2007.
33. Association of antiendometrial antibodies with missed abortions and ectopic. West Virginia University/Charleston Area Medical Center IRB Approved Protocol #08-10-2090.
34. Cervical length and premature birth. West Virginia University/Charleston Area Medical Center IRB Approved Protocol #08-12-2113.
35. Substance abuse in pregnancy: role of universal urine drug screening and integrated addiction therapy in West Virginia. West Virginia University/Charleston Area Medical Center IRB Exempt Protocol #1997097.
36. Community Awareness Resources and Education (CARE-II)-Project 1: Causes of High Cervical Cancer Rates in Appalachia (NCI/Ohio State University). West Virginia University/Charleston Area Medical Center IRB Approved Protocol #1997187-27 Jan 2012.

Funded Investigational Protocols:

1. The effects of low dose acetylsalicylic acid infusion on perfusion pressure in the dual perfused Isolated human placental cotyledon model. Madigan Army Medical Center IRB Approved Protocol #96-100. Air Force Clinical Investigations Protocol SGO #96-100 (\$4,390)
2. The effects of adrenomedullin and angiotensin II on fetoplacental vascular tone. Madigan Army Medical Center IRB Approved Protocol #97-035. Air Force Clinical Investigations Protocol SGO #97-110 (\$2,843).
3. Plasma levels of adrenomedullin, a hypotensive peptide in the fetoplacental circulation. Madigan Army Medical Center IRB Approved Protocol #97-044. Air Force Clinical Investigations Protocol SGO #97-111 (\$1,465).
4. The vasoactive effects of adrenomedullin on fetoplacental vasculature precontracted with endothelin-1 or the thromboxane mimetic. Madigan Army Medical Center IRB Approved Protocol #97-210. Air Force Clinical Investigations Protocol SGO #97-210 (\$2,308).
5. The effects of lipopolysaccharide and inflammatory stimulus on placental production of interleukin-6 in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol # 97-309. Air Force Clinical Investigations Protocol SGO #97-309 (\$3,618).
6. The expression of adrenomedullin and its receptor in the human placenta. Madigan Army Medical Center IRB Approved Protocol #98-068. Air Force Clinical Investigations Protocol SGO #98-0001E (\$4,285).
7. The effects of magnesium sulfate on placental production of interleukin-6 in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #98-105. Air Force Clinical Investigations Protocol SGO #99-0001E (\$1,500).
8. The effects of shear stress on placental production of interleukin-6 in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #99-064. Air Force Clinical Investigations Protocol SGO #990006E (\$2,000).
9. The effects of hypoxia and hypoxia with acidemia on placental production of interleukin-6 in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #2000-013. . Air Force Clinical Investigations Protocol SGO #2000-0013E (\$2,800)
10. Myometrial gap junctions and their importance in obstetric patients with chorioamnionitis. Madigan Army Medical Center IRB Approved Protocol #2000-015. Air Force Clinical Investigations Protocol SGO #2000-0015H (\$3,800)
11. The effects of hypoxia and hypoxia with acidemia on placental production of vascular endothelial growth factor, placental growth factor, and tumor necrosis factor (TNF-alpha) in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #2000-029. Air Force Clinical Investigations Protocol SGO #2000-0029H (\$5,720)

12. Magnesium in preeclampsia: plasma (maternal-fetal) and placental levels of ionized magnesium (iMg). Madigan Army Medical Center IRB Approved Protocol 2000-091. Air Force Clinical Investigations Protocol SGO #2000-0091H (\$400)
13. The effects of hypoxia and hypoxia with acidemia on placental production of adrenomedullin in the in the isolated dually perfused placental cotyledon. Madigan Army Medical Center IRB Approved Protocol #2000-96. Air Force Clinical Investigations Protocol SGO #2000-0096H (\$1,600)
14. Phospholipase A2 Producing Bacteria, Age at Gestation, Cervical Length Measurement and the Incidence of Pre-Term Labor. West Virginia University/Charleston Area Medical Center IRB Approved Protocol #08-11-2097 (1/1/2009) (\$20,000)
15. Community Awareness Resources and Education (CARE-II)-Project 1: Causes of High Cervical Cancer Rates in Appalachia (NCI/Ohio State University). West Virginia University/Charleston Area Medical Center IRB Approved Protocol #1997187-27 Jan 2012. (\$80,000/year)
