Signs will be provided at the rally

WHAT IS THIS CASE ABOUT?

The FDA betrayed women when it removed the in-person doctor visits and ongoing care it originally deemed necessary for the use of abortion drugs. The Supreme Court is considering whether to require the FDA to honor its duty to protect women's health and reinstate its safety standards.

WHAT'S AT STAKE?

Whether the FDA will protect women's health and safety.

WHAT IS YOUR ROLE?

You can stand with women harmed by the FDA's actions and hold it accountable for leaving women to have abortions alone without the care of their doctor.
